

Press Release

ALSO Finland Oy, Tampere, 18 July 2011

Finnish Dacco wholesale customers will get their products and services from ALSO Finland Ltd. in the future

Mikrolog Ltd. has decided to end the Dacco wholesale business in order to focus on its core business that is IT-systems and system integration.

IT dealers will get an even broader range of solutions from the largest IT-solutions and home electronics distributor in Finland, ALSO Finland Ltd that buys Mikrolog's wholesale inventories. Possibilities of different types of clients to get the products they need combined with expert service from a single location are strengthening.

Dacco wholesale operations end 31.07.2011. "We are fully prepared to serve both current and new clients – in the summer as well as after the holiday season" says Managing director Maija Strandberg from ALSO Finland Oy.

Mikrolog will further inform Dacco-wholesale customers concerning the practicalities relating to ending the wholesale operations.
